EDUCATION

Master of Science, Information Technology	May 2025
Arizona State University, Tempe, Arizona	GPA– 3.83/4.00
Master of Computer Applications	May 2021
Graphic Era University, Dehradun, Uttarakhand – India	CGPA– 9.58/10.00
Bachelor of Computer Applications	May 2019
Graphic Era University, Dehradun, Uttarakhand – India	CGPA– 9.19/10.00

TECHNICAL SKILLS

Languages & Fundamentals: Python, Java, C#, JavaScript, SQL, Scala, Unit & Integration Testing

Cloud & Infrastructure: AWS (Lambda, Step Functions, API Gateway, Aurora, S3, SQS, SNS, SageMaker, CloudWatch), Microsoft Azure, Docker, Kubernetes, Terraform

Databases & Data Engineering: PostgreSQL, MySQL, ETL Pipelines, Data Modeling, Query Optimization

Web & Application Development: .NET Core, Node.js, React.js, Angular, Spring MVC, Flask, REST APIs, Microservices

Data Analytics: Advanced SQL, Excel (Pivot tables, formulas), Tableau, Power BI

AI/ML: Sentiment Analysis, NLP, LSTM, Gradient Boosting Models, Model Deployment

DevOps & Tools: GitHub, Azure DevOps, Jenkins, CI/CD Pipelines, Agile/Scrum

Certifications: AI-102 Azure AI Engineer Associate, AI-900 Azure AI Fundamentals, AZ-900 Azure Fundamentals

PROFESSIONAL EXPERIENCE

AWS Cloud Developer - LEAP Consultants LLC	Jun 2025 – Present
- Engineered distributed, serverless workflows using Lambda, Step Functions, Aurora PostgreSQL, and API Gateway to process over 5,000 student risk records weekly, delivering low-latency, fault-tolerant execution. - Optimized database schemas with new indexes and UUID automation, improving query performance by 40% and reducing operational costs. - Established a database change-tracking and documentation framework, eliminating update mismatches and achieving 100% reduction in communication errors across the development team.	
Teaching Assistant - Data Visualization, Cyber Risk Management (ASU)	Aug 2024 – May 2025
- Mentored 250+ students across Cyber Risk Management and Data Visualization, improving project outcomes and assignment scores by 15–20%. - Conducted workshops on Tableau, Power BI, and risk frameworks, reducing support requests by 25% and strengthening practical understanding.	
Software Engineer - Cognizant Technology Solutions	Apr 2021 – Aug 2023
- Architected multi-threaded .NET Core microservices that accelerated client/product data workflows by 75% from 60 minutes to 15 minutes, enabling high-throughput processing at scale. - Engineered and deployed an Angular web platform adopted by 200+ employees, automating eligibility checks and cutting manual effort by 60%, while improving accuracy and response time. - Automated QA pipelines with a Python Test Bot, executing 100+ test cases daily and boosting validation throughput by 50%, strengthening release reliability and speed. - Designed and implemented a C# rule engine capable of dynamically processing 10–15 evolving business conditions per day, ensuring consistent and reliable client recommendations in production. - Facilitated Agile practices across a 10-member team, improving collaboration and accelerating delivery timelines by 20%.	

ACADEMIC PROJECTS

Feedback IQ– Cloud-Native Customer Feedback Portal	Feb 2025 – Mar 2025
- Architected a React.js + AWS solution with Lambda, S3, RDS, Comprehend, SQS, and SNS to handle 1000+ feedback entries daily. - Deployed AI-driven sentiment analysis with real-time alerts, cutting manual review effort by 60%. - Secured production rollout on AWS Amplify with IAM, achieving 99.9% uptime during pilot testing.	

ACTIVITIES & HONORS

- Led an internal hackathon at Cognizant with 30+ participants, guiding cross-functional teams to deliver 3 Python prototypes, one of which was adopted into production.
